

CIRCUS

CIRCULAR AND SUSTAINABLE TOOLS FOR ADULTS

2019-1-UK01-KA204-061972

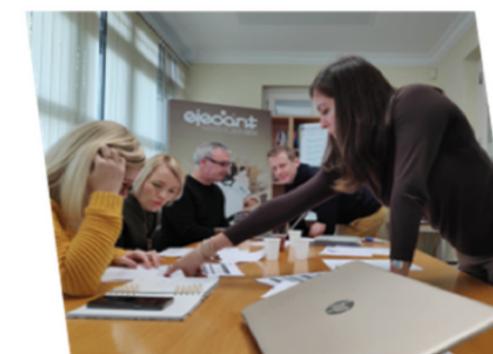

This strategic partnership empowers adult trainers and adult people with tools for the creation of circular and sustainable projects as we are sure they are the key to accelerate this transition, as potential drivers for change.

MAIN PROJECT ACHIEVEMENTS

KICK OFF MEETING

The first meeting was held in Santander, Cantabria (Spain) between the 11-12th November 2019. In this meeting we reviewed the project proposal, working plan, task distribution and deadlines assigned to each participant. We also reviewed the budget approved of each partner. With this meeting we started the preparation phase officially. The dissemination campaign and its tasks were distributed.

Newsletter

INTELLECTUAL OUTPUT

The intellectual output we are developing in the project is an interactive book. It will be between 70-80 pages long.

The intellectual output developers are carrying out an in-depth investigation on secondary and primary resources regarding the best practices, key elements in circular economy, tools, etc. within the participating organizations and in other relevant institutions of these countries. They are having constant Skype meetings to review their investigations and decide the information that will be included in the book. With this, the intellectual output developers are writing some parts of the book in a collaborative way, not leaving behind the main purposes of this intellectual output:

- A practical approach to implementing circular economy and sustainable development goals (SDG's) in any project or organization.
- A simple way for transforming organizations towards circular economy.
- A roadmap for adult entrepreneurs who wish to create innovative sustainable projects.

NEXT STEPS

TRAINING COURSE

Between the 11-18th September 2020 a Training Course will be held in Spain.

It has been designed to comply with one of the goals of the project:

To make adults and adult workers acquire new entrepreneurial skills based on sustainability through the new methodologies and tools offered during this Training Course, in order to promote entrepreneurship education and social entrepreneurship among young people.

The methodology of the course will be a combination between theoretical participative activities and the analysis of real case studies, in which the participants will be able to visit local initiatives of entrepreneurship in rural areas of Cantabria while they will attend different training sessions about sustainability, entrepreneurship and innovative methods of project design.
